EXPERIENCE SUMMARY

My career started as a first responder in the Fire & Rescue Service, covering the extremely varied industrial and urban area of Central Scotland. I specialised in oil and industrial emergencies and was promoted to lead on the Specialist Support Unit for rescue and special operations, as well as station command.

Training the skilled and safe teams I led, took me to the position of lead instructor of fire, emergency and major incident management for the oil, gas and petrochemical industries in the UK and Internationally. Subsequent success in this field resulted in a move to direct operations requiring my skill set in preventing major incidents, while also developing positive safety culture. I have had the pleasure of working with leading companies from Marathon to BP and TAQA, including all the related supporting companies of the energy sector.

Latterly nine years as a Senior Safety Advisor, has included responsibilities for the Technical Directorate comprising Major Projects, Wells & Drilling, Subsea Pipelines and Diving, Facilities Management and Decommissioning.

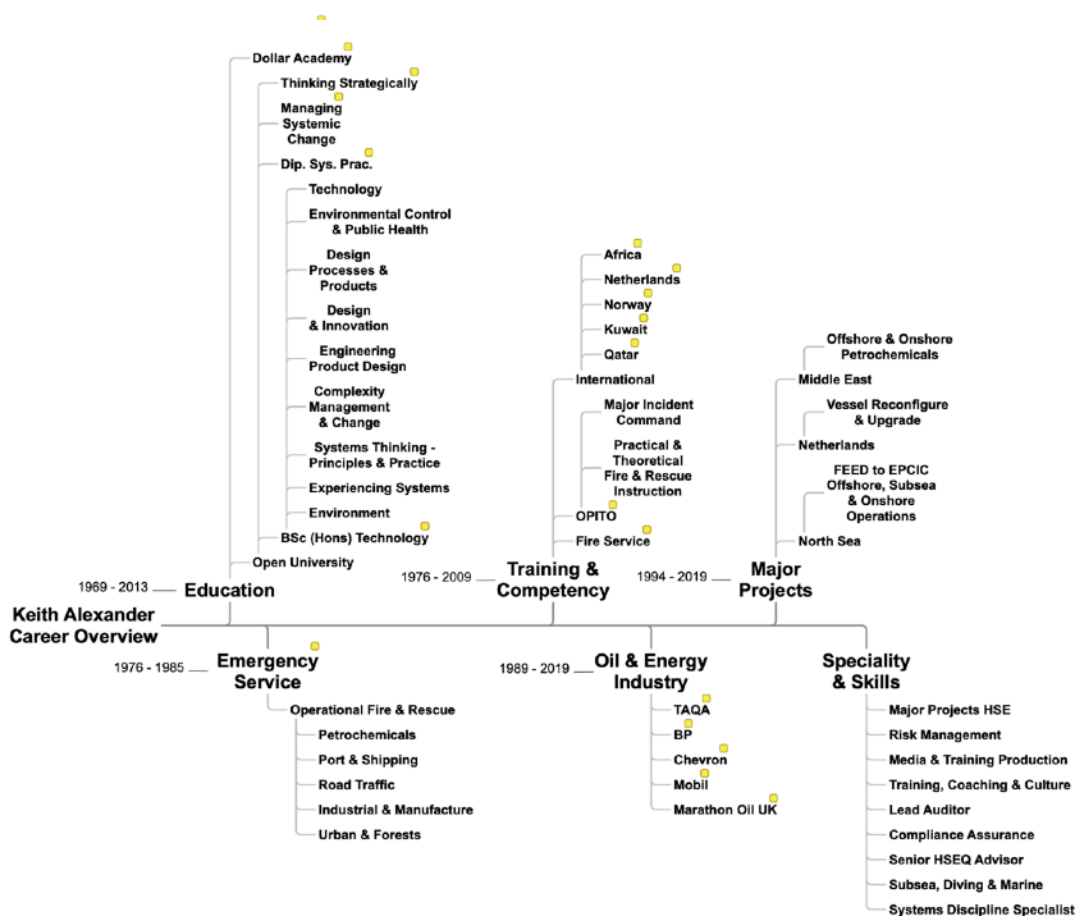

Recognised by senior management for my breath of experience, discipline knowledge, holistic thinking and impactful topic presentation.

During the Covid-19 Pandemic, I used an authoritative information network of key global academic institutes and experts, enabling me to provide accurate and informative advice on all aspects of the hazard, occupational risk and precautions required for any working situation or location.

Facilitating Risk Assessment & Management is a core strength. I can facilitate Hazard Identification & Risk Assessment at any level, using multiple models. My reputation is for delivery of focussed safety, process and business risk identification, to avoid loss or highlight opportunities for improvement.

I have been acknowledged for skills in authoring procedures to be compact, efficient and relevant. Also an ability to illustrate situations using a variety systems techniques. These techniques are also applied to the production of visually rich and effective training and coaching media. I have strong interpersonal skills for building relations, including international and cultural diversity.

This is a simplified career overview, highlighting core competencies, experience and skill areas. There is fuller detail in my full CV on my personal web pages.

I have the capability to work in any local location, or using remote working systems.

I offer the advantage of bringing a lifetime of experience and cross discipline knowledge to the benefit of organisations. Throughout my career I have always achieved improved safety and efficiency, that also results in cost benefits.

Additionally I have a ready resource of media production and coaching solutions.
